

GT5000

“Presenting” the GT5000 Series TTW ATM

Genmega introduces the **GT5000** series ATM. A high performance yet economical **Through-The-Wall ATM** solution with the look and feel of a full bank ATM. Designed for wall or Kiosk installation, the **GT5000** series makes new TTW installation or replacements a snap. Built with the same compact modular components as your existing Genmega machines and engineered for easy installation and reliable operation. The **GT5000** includes high-end features like a 15” High Bright LCD which support custom advertisements and a 3-cassette cash dispenser with motorized cash presenter. A new Touch-Screen rear-service panel allows convenient and safe access for ATM Operators and Service personal.

The **GT5000** series ATM is ADA compliant and Chip Card (EMV) ready, including a PCI / Interac certified encrypting PIN pad (EPP), a voice guidance system, and lighted action indicators (including lighted keypad). Features of a high end **Through-The-Wall ATM** with the low maintenance and reliability that Genmega delivers makes this an excellent TTW solution.

Depth = 33.9"
Weight = 570 lbs

Operating Environment

Temperature range : 40°F - 95°F
Relative humidity : Non-condensing=15%-85%

Power Requirements

110/220 VAC ± 10%, 50/60 Hz, 145 Watts

GT5000

Installation Specs

This document provides dimensions and specs for planning your GT5000 installation. The wall hole should be sized 35.7" (height) and 20.5" (width) as shown below.

The maximum wall thickness for installation is 10". If a wall thickness of less than 4" will be used, then you will need to fabricate a spacer to fill the distance between the back of the wall and the side brackets.

The dimensions below show the machine installed so that the upper-most control is at the 48" height required for ADA.

The following shows how to set the hole dimensions so that the machine will have the correct height for ADA compliance.

The outside dimensions of the GT5000 are shown below, the 24" X 38.5" dimension represents the machine with the front bezel installed.
