

The future of small footprint, full function, **recycling** ATMs is here. The **8100T** is the smallest footprint, full function, through the wall ATM available in the market today. The **8100T** gives financial institutions the ability to offer full functionality including cash and check deposits including denomination selection powered by today's latest recycling technology with easy replenishment. Hyosung's modular design and high availability has made the **8100T** a popular choice to meet the changing demands especially where space is a premium. Learn why large and small financial institutions continue to standardize on the **8100T**, helping make Hyosung the fastest-growing ATM company in the United States.

KEY FEATURES

INNOVATION

Small footprint cash recycler that can be deployed anywhere. Full function deposit capability enables financial institutions to extend their presence to consumers. High capacity recycling module creates efficiencies within the cash cycle. Also, NFC capability enhances digital migration strategies.

SERVICE

Innovative design and the use of Hyosung manufactured core technologies allows for fast, easy replenishment and reduced downtime.

FUNCTIONALITY

Unparalleled delivery range of transactions outside the traditional branch space: compact, full-function efficiency. The hardware is enabled for supporting a wide range of transactions typically delivered in the branch and off premise.

CAPACITY

High capacity cash recycler capability and the ability to support check deposit functionality.

FLEXIBILITY

Efficient method of providing full functionality in new markets. The small footprint enables a wide variety of placement possibilities.

HYOSUNG

Smallest, Through the Wall, Full Function Recycler

8100T
